Application for QA Lead

Dear Hiring Manager,

I am applying for the QA Lead position at Company Name. I currently work as QA Team Lead at Efectivo / Humanit Group, run Consulting Wojciech Bajer, and recently co-founded Lexense.ai where I serve as Co-founder and CTO.

My work combines leadership and execution. I define QA strategy, test architecture, release readiness, and cross-team quality processes, while still working directly with tooling, CI/CD, observability, and automation. I have led ecosystem-level QA initiatives, introduced reporting and monitoring workflows with Grafana, Datadog, and ReportPortal, and supported product, engineering, and commercial teams with structured quality ownership.

Earlier in my career I worked across automotive, consumer electronics, and hardware-integrated systems, including Dolby Laboratories, Polestar, and Volvo Cars. That background helped me build a practical approach to quality: align teams around risk, improve feedback loops, automate what matters, and keep delivery moving.

I would bring to Company Name a hands-on QA lead profile that can set direction, support teams operationally, and improve quality at both the process and implementation level.

Sincerely,

Wojciech Bajer
