Application for Role Title

Dear Hiring Manager,

I am applying for the Role Title position at Company Name. I currently work as QA Team Lead at Efectivo / Humanit Group, run Consulting Wojciech Bajer, and recently co-founded Lexense.ai where I serve as Co-founder and CTO.

My background combines QA leadership, test automation, DevOps, and cloud delivery. I have built end-to-end automation from scratch, maintained CI/CD pipelines, implemented observability workflows with Grafana, Datadog, and ReportPortal, and worked across frontend, backend, mobile, and hardware teams. My earlier experience includes DevOps consulting for Polestar and Volvo Cars and quality engineering work at Dolby Laboratories.

What I bring is a practical engineering mindset, the ability to work across disciplines, and a strong bias toward delivery. I am comfortable defining QA strategy, improving release processes, building internal tooling, and supporting teams that need both quality ownership and hands-on implementation. I would welcome the opportunity to bring that mix of leadership and execution to Company Name.

Sincerely,

Wojciech Bajer
