Professional Summary

Hands-on QA Lead with commercial experience across API, customer-hosted servers, backend, frontend, mobile, end-to-end, and infrastructure workflows. Line-managed a 5-person QA team, owned QA strategy, QA minima, release readiness, and quality metrics across a 6-8-layer ecosystem, and built and maintained dozens of E2E and API scenarios. Reduced regression and release validation by more than 1 day, cut manual verification effort by 30%+, and supported several releases per month. Additional after-hours work at Lexense.ai strengthens backend, infrastructure, and architecture depth while keeping the primary profile focused on quality leadership.
